

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ENTERED, according to Act of Congress, in the year 1847,

By D. APPLETON & Co.,

In the Clerk's Office of the District Court of the United States, for the Southern District of New-York.

P R E F A C E .

THE object of the Publishers of the following pages has been to present, in a collected form, indications of the most important works in every department of literature, arranged in such manner as admits of the most easy reference.

PART I. consists of SUBJECTS, alphabetically arranged, with the exception of *Mathematics, Medicine, and Theology*; all the subjects of these divisions are collected under those general heads, in preference to scattering them through the body of the work.

PART II. comprises *Select Biography, Classics, Collected Works*, and an *Index of Authors* whose works appear in Part I.

In the necessarily limited space devoted to the development of the plan, it is evident that but little of it could be occupied with the Curiosities of Literature: the various Bibliographical works already extant amply suffice to make known their peculiar claims upon the attention of the Man of Letters. What has chiefly been attempted is, to exhibit under each head the extent of its literature, so far as might serve the purposes of the general reader: to the Student, whose aim is exhaustive, the Bibliography of each subject, when known, being given, will direct him to sources whence he may supply the deficiencies that must necessarily exist in a work of limited extent, like the present. Whenever the question of *omission* has occurred, the unknown work has been retained in preference to the well known.

Prices.—Books are subject to as many fluctuations of value as other articles of merchandise; but as it was considered desirable to affix prices to the titles whenever they could be ascertained, they must only be regarded as approximate: those given, are generally the same at which the books were published; and will help to give some idea of the extent, &c., of any work in question: but as no list of prices can be permanently correct, those given are, for many reasons, to be preferred.

Notwithstanding the great care and labour bestowed upon this book, the intelligent reader will notice many omissions, which it will be the Compiler's care to supply in a Supplement: some typographical errors will also be evident, but as they are so palpable, they will in no way impair the general integrity of the work. When it is considered that the work is made up of minutiae, it is a matter of gratulation that so few errors have crept in.

American Works.—It has not been thought necessary to enter very fully into the details of American Literature; there was no object to be gained by occupying the very limited space at command with chronicling books that are

in every body's hands, or which it is the Publishers' special interest to make known through the usual channels : besides, there is reason to expect a special American Bibliography ere long, in which the genius and industry of the New World may be favourably exhibited in contrast with that of the Old.

We are not without the hope that this compilation may exert a favourable influence in the Republic of Letters. The Student, through its aid, will be enabled to observe the extent of the subject of his inquiry, and the authors most worthy of his notice. The Man of Letters will be enabled to ascertain the comparative richness and poverty of the literature of his native tongue, and to enlarge the sphere of his labours, either by translation or the production of original works calculated to supply the deficiencies that exist in many branches of literature ; while the Publisher will be enabled to recognize many important works with which he can enrich his stock of publications. Those engaged in the formation of libraries, we feel assured, will welcome the aid these pages can afford them. By the publication of an annual Supplement, in which all new works of permanent value shall find a place, as well as the more important omissions in the body of the work, it is intended it shall occupy a permanent place in the Library.

To have added critical opinions or analyses of the contents of the various works enumerated, would, we are aware, have increased the value of this Manual ; yet it could not have been done without increasing its bulk to an undue extent.

In conclusion, the Publishers feel the present a fit occasion to return to their many friends and countrymen their warmest acknowledgments ; and while they do not desire to exert any undue influence by this publication, to the prejudice of others in the trade, yet believing it to be an important contribution to the cause of human knowledge, and considering the great expense they have incurred in its preparation, they trust that their peculiar facilities for obtaining books from all parts of Europe, and their large stock, will induce the personal application of their friends. As this publication, from its peculiar plan, will develop *new* riches and corresponding desires on the part of the student, it is proper to state that any books found in this compilation may be obtained in the space of a few weeks, and at the lowest prices, through their agencies abroad. The steam communication now established between *France* and *Germany* enables them to execute orders with as great facility from the Continent, as formerly from England.

This volume contains an account of the habits, utility in food, manufactures, agriculture, or domestic economy, and the noxious qualities of such as are in any way injurious to man, of each species, of this the highest class in the animal kingdom; and an attempt has been made to define the characters of many of the species with more accuracy than has been done by previous authors. The illustrations comprise a figure of every species, and of many varieties, with numerous pictorial tail-pieces and anatomical diagrams, illustrative of the text, amounting, in all, to two hundred.

- TABLES** showing the Total Number of Persons Assured in the Equitable Society from its Commencement in 1762 to 1829, &c. &c. By Wm. Morgan. sm. folio. *London, 1834*

"This most elaborately prepared and important document reflects the highest credit on the talented actuary who prepared it. It entirely supercedes the tables of Babbage and Davies, and furnishes complete and perfect data for the computation of a safe and accurate set of tables for the use of life assurance companies."—*Pocock*. - SANG, (E.)** Life Assurance and Annuity Tables. Folio. *Edin., 1841*

A most extraordinary work. The author learned to print, that he might set it up with his own hands. It contains for a single life, and for the Carlisle Tables, at three per cent, every thing. All annuities and assurances, temporary and deferred, or for the whole life; all values of Policies, whenever made, for every subsequent period; all the yearly risks of such Policies; assurances at increasing or decreasing premiums; five figure logarithms and anti-logarithms, &c. &c. &c. And every result has its logarithm set down by its side ready for use. The typography is so beautiful, the paper and type so luxurious, that a century hence a copy will be an object of competition to the Hebers and Spencers of that day.

CHIEF SUBJECTS TREATED OF IN THE PHYSICAL ATLAS.

I.—INORGANIC NATURE.

1.—METEOROLOGY AND MAGNETISM.

1. Temperature.—Showing Isothermal Line or Line of Equal Heat.
2. The Winds.—Showing the Distribution of Passage-Winds, Hurricanes, Tyfones, &c.
3. Rain and Snow.—Showing the Yearly Amount falling over the Globe.
4. Rain and Snow.—Showing the Yearly and Daily Amounts for Europe.
5. Magnetism.—The Polarizing Structure of the Atmosphere.

2.—HYDROLOGY.

1. Physical Chart of Atlantic Ocean.
2. Physical Chart of Indian Ocean.
3. Physical Chart of Pacific Ocean.
4. Tidal Map of Europe.
5. River Map of Europe and Asia.
6. River Map of America.

3.—GEOLOGY.

1. Mountain Systems of Europe.
2. Mountain Chains in Europe and Asia.
3. Map of the Glacier Regions.
4. Mountain Chains in North America.
5. Mountain Chains in South America.
6. Geological Map of Europe.
7. Geological Map of England.
8. Geological Map of Scotland.
9. Regions of Earthquakes and Volcanoes over the Globe.
10. Specials of Volcanic Girdle in Atlantic Ocean, &c.

II.—ORGANIC NATURE.

PHYTOLOGY AND ZOOLOGY.

1. Distribution of Food-Plants over the World.
2. Distribution of Plants in Horizontal and Perpendicular directions.
3. Distribution of Animals.
4. Distribution of Quadrupeds.
5. Distribution of Birds.
6. Distribution of Fishes.
7. Distribution of Reptiles and Snakes.
8. Distribution of Man—Europe.
9. Distribution of Man—British Islands.

DICTIONARIES.

- REID, (A.) A Dictionary of the English Language ; containing the Pronunciation, Etymology, and Explanation of all Words authorized by eminent writers ; to which are added a Vocabulary of the Roots of English Words, and an accented list of Greek, Latin, and Scripture Proper Names. With a Critical Preface by Henry Reed, Prof. of Eng. Lit. in the Univ. of Pa. 12mo, near 600 p., \$1. New-York, D. A. & Co., 1846

The attention of Professors, Students, Tutors, and Heads of Families is solicited to this volume. Notwithstanding its compact size and distinctness of type, it comprises *forty thousand words*. In addition to the correct orthoepy, this manual of words contains four valuable improvements :

- I. The primitive word is given, and then follow the immediate derivatives in alphabetical order, with the part of speech appended.
- II. After the primitive word is inserted the original term whence it is formed, with the name of the language from which it is derived.
- III. There is subjoined a Vocabulary of the Roots of English words, by which the accurate purport of them is instantly discoverable.
- IV. An accented List, to the number of fifteen thousand, of Greek, Latin, and Scripture Proper Names, is added.

This work contains above 50,000 words, (embodying all the known scattered glossaries of the English language), forming a complete key for the reader of the works of our old Poets, Dramatists, Theologians, and other authors whose works abound with allusions, of which explanations are not to be found in ordinary Dictionaries and books of reference. Most of the principal Archaisms are illustrated by examples selected from early inserted MSS. and rare books, and by far the greater portion will be found to be original authorities.

The Reptiles of this country, although few in number, are not devoid of considerable interest; their habits are popularly much misunderstood, and several innocent and useful species are shunned and destroyed, from a mistaken notion that they are directly or indirectly noxious to man. The elucidation of their habits, the distinctive description of the species, their geographical distribution, and the history of the transformation of all the amphibious forms, are amongst the subjects discussed. In addition to a figure of each species, and of some of the most important varieties, the illustrations comprise many of structure, development, and transformation.

II. THEORETICAL TREATISES, &c.

- WEBER, (G.) *An Attempt at a Systematically Arranged Theory of Musical Composition.* Translated from the 3d German edition, with Notes, by J. F. Warner. 2d ed. 2 vols. roy. 8vo, \$5. Boston, 1846

The distinguishing characteristic of this work is, that it is a theory of musical composition conformable to the present state of the art: a view of the rules and methods practised by Mozart, Beethoven, Mendelssohn, and Spohr: it is unique for the copiousness as well as appositeness of its musical illustrations. The treatise of Albrechtsberger is full of antiquated pedantry, and that of Cherubini wholly unworthy of his illustrious name. In Germany, Weber's work is the standard authority. The works of Reicha and Marx possess some peculiar merits, but they aim more at particular excellencies, while Weber aims at general and universal ones.

ANTHEMS AND SERVICES for Church Choirs. vol. 1, sm. 4to, 21s. London, 1867

Published monthly, in numbers varying in price from 6d. to 1s. 6d. each.

The work consists of reprints of standard English Music, and of some of the finest compositions of foreign authors, carefully adapted to English words by Messrs. Ingram, Moxley, Gannett, Cooper, Spencer, and other professional musicians.

Instrumental Accompaniments are added to all the Pieces, and are recommended as Organ Voluntaries.

The object of the present publication is to supply a desideratum created by the taste for Choral Music now so generally revived. It is intended to consist chiefly of reprints of standard English Anthems, and of adaptations of foreign Music; with a few specimens by living Composers. The compositions will vary as to structure, length, number of vocal parts, &c., in order that Church Choirs of different degrees of proficiency may find their wants provided for; but the general character of the whole will be uniform, and will present that combination of solidity and beauty which marks the style of our greatest composers, and which, by general consent, has been denominated "the Church style."

The work is closely but clearly printed, in 4to, from a new type; the Music is in full score; and the price of the numbers varies from sixpence upwards. It is published at a very cheap rate, in order that Choirs may be enabled to procure a supply of suitable Music in score, thus avoiding the trouble and inconvenience of MS. voice parts.

The words will, in all cases, be taken from Holy Scripture or the Book of Common Prayer.

This Collection of the Books of Common Prayer is uniformly reprinted in Six Volumes small folio, in Black Letter, like the original editions. Their importance and value are well known: but it is remarkable that in no public, or private, or collegiate library can the whole of these Books be found together. A limited number only has been reprinted; and may be purchased in sets, but not separately.

The Book of 1662 has been carefully collated with the Sealed Book in the Tower of London, and other copies of the Sealed Book have been occasionally consulted.
